Dear Sir,

I am Jinam Manoj Sancheti (BT21ECE074), I am writing this mail on behalf of our team for the approval of our Python Project.

My project-mates are:-

Atharva Asalkar (BT21ECE073)

Khushi Chourasia (BT21ECE084)

Shreeyash Narad (BT21ECE075)

Our Project is named "**STUDAL**", to be more precise, it means *Student Portal*.

We have tried to consolidate important daily tasks in a student's life at STUDAL.

STUDAL can perform the following tasks:-

- Student Registration / Login
- Student Statistics and Personal Information
- To-Do-List
- Study Materials
- Game Zone
- Student ID Card Display
- Time Table

We will use the Concepts of **OOP**, **File Handling**, basics of **OpenCV**(Image Processing) and different data types according to our requirements.

If time permits we will add some more interesting and useful features to STUDAL.

So Sir, if you think our project satisfies project requirements and is capable enough to add value to a student's life, please do approve it.

Yours Sincerely,

Jinam Sancheti
